## Help Us Reduce Waste – Go Digital!

We're committed to making more sustainable choices, and one simple way to help is by switching to digital publications instead of printed ones.

Not only have we seen growing interest in going paperless, but we've also noticed a significant amount of returned mail – which unfortunately leads to wasted paper, ink, and energy.

We'd love to hear your thoughts on moving towards digital-only communications. Just click the link below to share your feedback.

**And if you haven't already, now's the perfect time to sign up for our email updates – it's a greener, faster way to stay informed.**

Have your say, take our survey!
