

CS 1300

Clarity at every angle. Simply integrated.

Clear images that support your workflow

The CS 1300 intraoral camera is designed to deliver high-quality images that help support patient communication and day-to-day clinical documentation. Its intuitive handling, rotating head and lighting features help make image capture efficient—while its integration with CS Imaging version 8 and third-party software simplifies your workflow.

- HD clarity for confident patient conversations
- 280° rotating head designed for easy image capture
- One-click image capture
- Wide focus range for macro details and broader views
- Smooth integration with Carestream Dental software
- Plug-and-play setup for straightforward installation and sharing

280° rotating head

Easy one-click image capture

Unified imaging workflow

Connected imaging. Confident conversations.

Show patients what you see with detailed images that help explain conditions and treatment options. The CS 1300 connects seamlessly with CS Imaging software, creating a unified imaging workflow that saves time and supports efficient case discussions.

High-quality imaging

The CS 1300 provides detailed images across a wide focus range—from macro to dental arch views. Two autofocus modes support sharp, precise results with minimal adjustment, helping enhance communication and patient understanding.

Easy, comfortable access

A 280° rotating head and ergonomic design help access various areas of the mouth comfortably, supporting efficient image capture while helping reduce operator fatigue.

Lighting that adapts

Nine adjustable LED lights provide consistent illumination with reduced glare. Selectable color-temperature modes allow clinicians to choose their preferred lighting environment.

Intuitive interface

Capture and review images easily using the camera button and user-friendly interface. Images can be stored within CS Imaging to keep patient records organized and accessible.

Plug-and-play simplicity

Simply connect the camera to your PC—no drivers required—and start using it immediately. Installation is easy, which also makes sharing between operatories quick and convenient.

Smooth integration

The CS 1300 is designed to work smoothly with CS Imaging for a unified user experience. It also supports TWAIN compatibility, offering flexibility when connecting to third-party software.
